Sustainability

Inheriting this profound philosophy, Town & Country has always had sustainability woven into its DNA. Our commitment extends beyond mere words; it is reflected in every aspect of our business.

Town & Country continuously works to create a higher environmental standard, striving to lower its carbon footprint and provide customers with the most ecofriendly porcelain product on the market.

To reduce energy, water, and waste, Town & Country introduced an innovative formula that utilizes mostly raw materials found in the U.S., with a vast majority being sourced within 250 miles from our manufacturing plant in Crossville, TN. This produces a greener generation of products that is American made.

Our state-of-the-art manufacturing facility also operates with sustainability at its core. Key practices include a nearly closed- loop process, where raw materials and water waste are efficiently recycled back into production. Additionally, our facilities exceed legal requirements, incorporating antipollution devices such as smoke and Biscotti depurators, water purifiers, and reutilization of heat from kilns and production losses. The plant also utilizes eco-conscious packaging and has received accolades from rigorous certifications such as DECLARE, ISO 9001, LEED, EPD, GREEN GOLD, and GREEN SQUARED.

At Town & Country, our commitment to the environment resonates through every solution we create. We firmly believe that sustainable practices not only benefit our planet but also enrich the lives of those who choose our products.

The collection

A modern interpretation of two exquisite stones, T-739 Pierre celebrates the harmonious encounter between the timeless elegance of French limestone and the robust character of Ambrosia stone. Mirroring its origins, T-739 Pierre showcases a distinctive appearance characterized by the elegant interweaving of veins, evoking the effect of a surface shaped by time, and subtle natural fractures that impart depth and movement to an authentic and sophisticated material, perfect for design projects with a contemporary soul.

T-739 Pierre is crafted in the U.S. and comes in a semi-polished finish, enhancing its materiality and highlighting the delicate transitions between its varied faces. The collection offers three versatile dimensions—12x24, 24x24, and 24x48—along with a 4x24 Bullnose option, providing a range of design possibilities.
