The Asgard collection takes the aesthetic impact of glazed artistic ceramics to a new level of complexity. This series of hand-made and hand-glazed tiles in 5x25 cm (or 2x10 inches) format was born from the idea of combining the infinite effects of light reflected on metallic glazes with colors that emerge in ever-changing forms. The completely artisanal production process maximizes variability, even between individual pieces: each tile is unique in terms of shape, glaze distribution, and light effects. The combination of infinite unique pieces creates a harmonious, bold, and vibrant aesthetic impact.
